

LIFTING FAN MOTORS FROM THE CART

Here are two ways to lift a fan motor from the cart. If you are standing at the side of the cart, use your wide stance but stand at an angle to the cart. This gets you close to the motor but also gives you space to bring it to you. If you are at the end of the cart, use your wide stance but stand at the corner of the cart. This gets you really close to the motor and you can use your legs. Always try to make the job easier on you and your back. There is no sense in tearing up your back and making yourself tired also!
