

## **PICKING HEAVY LOADS**

Always, if possible, <u>stand over the corner of the pallet</u> to pick. If the corner is not accessible, put one foot on the pallet to get as close as possible to the load.

As you PowerLift® the load, move it quickly to your thigh. That way your legs are holding the load taking the weight off of your back.

To walk with a heavy load, <u>let it ride your thigh</u>. 30% - 50% of the weight will be carried by your thigh making carrying the load much easier.
