

USING A HOOK TO OPEN THE #9 VAULT COVER

Using a hook to open vault covers is a smart thing to do, because you want to make the job easier on yourself. Be sure to make it easier on your back also by standing over the corner of the vault cover with your knees bent so that you can use your legs to pull it off. Standing at the corner in a wide stance gives you the room you need to pull the cover towards you. This way your legs do the work, your job becomes easier and you save your back all at the same time. Nobody wants to have a hurt back, so use your legs for everything!
