

FILLING THE SOFTENER SALT BIN

Here is a great way to handle 40 lb bags of softener salt when filling the bin. First, use a POWERLIFT® Tip-the-Load to pick up the bag of salt. Then to make pouring it into the bin much easier, place a stool next to the bin to act as a stepping stone to the bin. Once the bag is up on the stool it is easy to open it and then teeter it over the edge of the bin to pour. This tedious job can be made much easier if you do a two-stage lift like this!
