

## HANDLING CARGO

No matter what type of cargo you are handling, you will find that **POWERLIFT®** can make the job easier and safer. As in the case above, the worker is using a wide stance POWERLIFT® and is also tipping the load to make the piece easier to lift. It is not the one time of using your back that will make it arthritic by your retirement age but rather using your back over and over again that wears your back down.
